TECHNICAL DATA SHEET

Glass Game

The anti-fog system for padel court glass

Padel courts free of condensation from first thing

PRODUCT DESCRIPTION

Glass Game is an electric anti-fog system for the glass walls of padel courts. It consists of low-consumption transparent sheets fitted to the outside of the glass, without changing how the court looks. Once switched on, it removes condensation in a few minutes, so the court can be used from first thing in the morning without losing bookings.

MAIN FEATURES

- ✔ Anti-fog for padel court glass
- ✔ Low-consumption transparent sheets on the outside of the glass
- ✔ Removes condensation in a few minutes
- ✔ Court ready from first thing

TECHNICAL DATA

What it is	Transparent anti-fog sheets for padel court glass
Power	60 W/m²
Voltage	230 V · 50 Hz (connection by an electrician)
Working temperature	+6 °C above the glass
Sizes	Made to fit each glass panel of the court
Installation	On the outside of the glass, with technical adhesive · connection by an electrician
Power line	10 mm² per phase, with its own circuit breaker and residual-current device
Control	Manual or Smart WiFi
Insulation	Transparent double insulating layer · UV resistant
Maintenance	None
Warranty	5 years
Made in	Molina de Segura (Murcia), Spain

INSTALLATION INSTRUCTIONS

How do I install it? They are stuck onto very clean outer glass with a technical adhesive, with the cable pointing up, as far as some junction boxes above the mesh. A qualified electrician always makes the connection.

What electrical installation does it need? An input cable of 10 mm² per phase, with its own circuit breaker and residual-current device. The whole court can be wired in series or in two halves. It has no earth connection because it has no exposed metal parts. The electrician who signs off the installation has the final say.
