Warm Feet Bed

Foot warmer for the bed: warm feet in minutes

Warm feet in minutes, all night long

PRODUCT DESCRIPTION

Warm Feet Bed is a foot warmer for the bed that goes under the fitted sheet, at foot level, and you barely notice it. In just a few minutes your feet are warm without the bed building up heat: you don't kick the covers off at night and you sleep for longer without waking, with no more icy feet. It is universal: suitable for single and double beds. It has no cover and no thermostat: it is a thin, simple sheet that heats only where it is needed, which is why it uses so little energy.
