TECHNICAL DATA SHEET

Clear Window · Transparent heater for shop windows

Shop windows always free of fog, with a barrier against the cold

HERGA ENERGY
Made in Spain
12/11/2026

PRODUCT DESCRIPTION

Transparent heating film stuck to the inside of the shop window glass. Same technology as Glass Game: it withstands rain, UV rays do not affect it, it does not turn yellow and it always stays transparent.

TECHNICAL DATA

Model +12 °C	**120 W/m² · no control**	Model +20 °C	**200 W/m² · with remote**
Model +30 °C	**300 W/m² · with remote · double glazing only**		
Voltage	**230 V · 50 Hz**	Widths	**31 · 43 · 55 · 90 cm**
Length	**From 60 cm to several metres**		
Cable	**2 m · other lengths to order**		
Production	**24/48 hours from payment**	Warranty	**10 years**
Made in	**Molina de Segura (Murcia), Spain**		

MAIN FEATURES

- Three models: +12 °C without control; +20 °C and +30 °C with remote control.
- Remote: 3 levels (50 / 75 / 100 %), timer of 2, 4 or 8 h or continuous, and an output for LED lights.
- Transparent silicone on the edges, with a red protector that is removed when fitting.
- Vertical or horizontal; if the glass is wider, two or more units are fitted.

INSTALLATION INSTRUCTIONS

- **Where is it stuck?** On the inside of the shop window, on clean, dry glass.
- **How is it stuck?** Remove the red protector from the edges and press: the transparent silicone holds it and it becomes invisible.
- **How is it connected?** To a separate 230 V line with its own fuse.

SAFETY REQUIREMENTS

- Handle with clean hands or gloves so as not to leave marks.
- Separate line with its own fuse: if a knock damages the film, it stays protected.
- The +30 °C model is only installed on double glazing.
