TECHNICAL DATA SHEET

Transparent heated windscreen

Defogs and defrosts the windscreen in seconds

HERGA ENERGY
Made in Spain
12/11/2026

PRODUCT DESCRIPTION

Transparent electric windscreen for vehicles, with HERGA's patented transparent glass heater technology. In series with the windscreen manufacturer, or with a film for existing windscreens.

TECHNICAL DATA

Voltage	**The vehicle's: 12 or 24 V · others to order**		
Heating wires	**Horizontal, finer than a hair**		
In series	**Inside the laminate, on the manufacturer's line**		
With film	**Transparent film for existing windscreens**		
Laminate	**Double PET layer**	Technology	**HERGA patented**
For	**Windscreen makers, body builders, machinery, buses, trucks, fleets and special vehicles**		
Made in	**Molina de Segura (Murcia), Spain**		

MAIN FEATURES

- Horizontal heating wires, finer than a hair and a few millimetres apart: almost invisible.
- The heat spreads over the whole glass: fog and ice disappear in seconds.
- Anti-freeze and better thermal comfort in the cab.
- More safety: double laminate with PET; broken glass comes away less.

INSTALLATION INSTRUCTIONS

- **Can I fit it to my existing windscreen?** Yes, with the transparent heating film.
- **And in series?** We integrate it into the laminate with the windscreen manufacturer.

SAFETY REQUIREMENTS

- Type approval of the windscreen is the responsibility of its manufacturer; HERGA supports it in the tests.
